Exit Strategies/Execution

Our partners have served as senior executives in global companies, banks and consulting firms. We have worked with companies, financial institutions, and governments in the U.S., Europe, Asia and Latin America. Our team is truly international with fluency and working knowledge in ten languages.

CGP has a track record of working with owners to produce fast paced and practical revenue focused solutions and formulating cost reduction programs across the board.

“Your firm is the greatest. I can’t imagine anyone living without you.”

Who We are

Our team is unique in that they have all achieved C level positions in their major functional area and have also been called upon to serve as CEO, COO, or CLO in global companies facing crisis decisions. Our ability to apply our expertise across functional lines is a critical asset to help you navigate your company. We formed Crimson Growth Partners because we liked working with each other. When you engage us you will have our expertise to leverage the strategic and operational impact of your decisions to help grow your company.

What We Do

We act as silent partners, not only as consultants, with the incumbent management teams. Our firm endeavors to capture value across each division of our corporate clients by delivering demonstrable structured and analytical results established in the short run between 3 to 5 years.

What We Do Best

We have restructured on-going enterprises and executed international expansions for divisions and for various industries. We have established green field corporate developments domestically and globally. The CGP team is well skilled in many languages and travelled throughout the world. As a team or individually, we enhance the economic value added of our clients to higher competitive levels.

Key Offerings

CGP is able to work on a retained, project or deal basis. We welcome the opportunity work with you in advance of a particular project or deal so that CGP helps you determine the best course of action and prepare your company internally and externally for the event. We have found that working with owners up to three to five years in advance of a plan exit can significantly enhance your business valuation.

Previous Experience:

- Boston Consulting Group
- MicroStrategy
- Sprint Telecom
- GE
- Others
